手动保存权重

保存权重

```
model.save_weights('./checkpoints/my_checkpoint')
```

重新加载权重

创建模型实例

```
model = create_model()
```

加载权重

```
model.load_weights('./checkpoints/my_checkpoint')
```

重新评估模型

```
loss,acc = model.evaluate(test_images,  test_labels,
verbose=2)
print("Restored model, accuracy:
{:5.2f}%".format(100*acc))
```
